

12 March 1956

Mrs. Harrison:

Last year you sent me a wide variety of $f^{\circ}F_2$ data to be analyzed for Spread F. This article will appear in the June issue of Journal of Geophysical Research.

Several issues of Dakar data were missing from your files. I wrote directly to France and had the missing issues sent to me. These arrived while I was away and have now been analyzed. Since I have no more need of these data sheets I am sending them to you herewith to keep.

If you have received any more Dakar $f^{\circ}F_2$ sheets after Dec 1954 please send down to me whatever is available as Dakar has turned out to be an important station in this study.
