Ref: Mine of 10/5/89

Dear Jack:

Enclosed are results of study entitled "Valley and Slope in F Layer". Two pages of text explain the ten graphs. These results confirm in more detail Alouette observations. At a future date I intend to return to this subject.

Now I will get on with analysis of low frequency f_oF_2 over Ottawa. You will hear from me in due course.

Thanks for past favors. Reemember me to Paul

Best wishes,

Grote Reber
