

16th September, 1966.

The Secretary,
Department of Forestry,
P.O. Box 37,
NORTH QUAY,
Brisbane, Queensland.

Dear Sir,

We have been informed by W.R.Wallace of the Forests Department of Western Australia that you have had substantial experience with a Swiss device called a tree bicycle. This appears to be pedal operated hoops. He also informs us that you have introduced modifications. Will the device operate on smooth poles free of bark? How long is required to open and close hoop when surmounting a branch? Any comments about the performance, or lack thereof will be greatly appreciated.

Yours faithfully,

Grote Reber.
