September 27, 1963

MR. GROTE REBER  
Commonwealth Scientific and  
Industrial Research Organization  
Tasmanian Regional Laboratory  
"Stowell", Stowell Avenue  
Hobart, Tasmania  
Australia

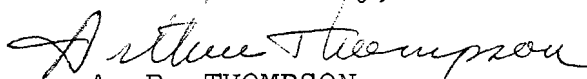

Dear Mr. Reber:

Mr. Pleasants of the Green Bank Observatory has sent me your letter of September 16 in which you say that you have suitable wheels and axles in storage at Bound Brook, New Jersey. The structural material for the Jansky antenna is all cut to size and we shall be ready to ship it in a couple of weeks. We shall be glad to pick up the wheels and axles in Bound Brook if you will let me know where they are stored and include in your letter a message to the storage people authorizing the Bell Laboratories to pick up the material.

We are very sorry that it has taken so long to take care of the Jansky antenna project but as you probably know our people at Holmdel have been very preoccupied putting up several big new buildings. Everything looks good now, however, and Mr. Pleasants has agreed to build the foundation and erect the antenna promptly after the material has reached him.

With my best regards,

Yours sincerely,

A. R. THOMPSON
