

10 June 1977

Greetings Jennie:

Thanks for yours of 6th plus enclosures from Mr. Schauer, etc. They arrived on 8th. The purchase order to PPG is correct. Acknowledgment #4775 from SAFT is also correct. You followed instructions OK but SAFT missed the nuts. These are on their acknowledgment. Nothing has arrived so far. I don't really expect anything soon.

I'm making a speaking trip 28/6 - 8/7 visiting Ottawa, Toronto, Rochester, Boston, NYC and back to Chicago. I'll arrive Laguardia 7 July 731pm on American 401 and leave 8 July at 400pm on American 315. Please make a reservation in my name for nite of 7th at George Washington Hotel.

OK.
J.E.

Apparently you will be on vacation. However, I look forward to seeing Mr. Schauer. From time to time mail would arrive without stamps being cancelled. I saved these. They total \$4.29 Now I'm gradually running these stamps thru a second time. I wonder what odds are for a third use?

Dear Hap:

The solar corona is outer atmosphere of sun. It manifests itself near the earth as solar wind. At solar activity minimum the corona contracts and ionization of earths upper atmosphere decreases. This varies from one solar cycle to next. My first low frequency radio astronomy observations in Tasmania during winter of 1955 demonstrated that, at times, the ionization decreases enough to create a usable hole at lmc or 300 meters. Unfortunately this cannot be counted on. The minimums of 1964 and 1975 had much higher ion content and no hole opened at lmc. Only recently has it been realized that the solar corona of 1954 was abnormally small. As of now, I've tossed in the low frequency radio astronomy business. There is one possible exception due 1979 or 1980 I'll discuss withyou next month. Also we'll straighten out the finances. If you are not in your office on the 8th, I can stay over week end in NYC and see you on 11th. However, I'd prefer to get back here soon as possible to supervise my work.

Yesterday I had a telephone call from Mike Daley of ABC (Australian Broadcasting Commission), Sydney. There was a pronounced delay in conversation. He will be in USA 18 July onward and would like to see you about 26th, if you're still around. I'll be with him.

Best wishes,
Grote Reber
