

11/5/90

Dear Paul:

So far I've analysed all the foF2 data available for Winnipeg/Kenora, Ottawa, and StJohn's. Some of my results I've sent to you. The rest will be sent in due course.

At One time there was an ionosonde in use at Prince Rupert, B.C. Please look into the subject. I'd like monthly sheets giving hourly values of foF2 Nov. 71 thru Feb. 77. If these are not available, please let me know over what period of time the Prince Rupert ionosonde operated. You will probably have to recover these from Archives.

Thanks again for past favors and assistance.

Best wishes,

Grote Reber
