Ref:

29th December, 1964.

Dr. G. Reber,  
C.S.I.R.O.,  
Tasmanian Regional Laboratory,  
Stowell,  
Stowell Avenue,  
HOBART, Tas.

Dear Dr. Reber,

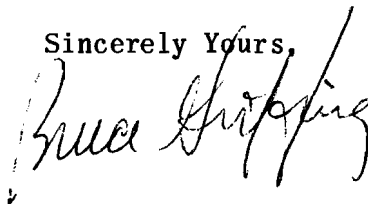

Thank you for your letter. As I am leaving for the United States in the near future, my reprints are no longer available to me. Hence I cannot send you the reprints I have of Dr. Lamprecht. I can, however, give you his address:-

Dr. H.A.K. Lamprecht,  
Plant Breeding Institute,  
Weibullsholm,  
Landskrona,  
SWEDEN.

Dr. Lamprecht has worked primarily with the Pisum genus but may have contributed to bean genetics as well.

I faintly remember someone in the Department of Agronomy, University of California, Davis, California, U.S.A., who has also made some contributions to genetics, of color patterns in beans. I am sorry that I cannot be more specific, but if you were to write to the Department of Agronomy, they would send your letter to the appropriate person.

Sincerely Yours,

(Bruce Griffing)
