

Trees.

Scarlet Gum, Divaricata, Willow

19/9/66 Removed from plastic pots. The roots pretty well covered entire bottom and lower sides of pots. Replanted each in a five gallon drum with plenty of soil up to top. Watered well.

29/10/66 Scarlet Gum and Willow doing well. Divaricata rather pale and anemic. Put up new large pole for Gum support.

1/11/66 Gum doing well. Willow anemic looking.

Took Willow and Divaricata outside greenhouse.

21/11/66 Gum doing well. Willow has lost most of its leaves but new small leaves sprouting. Divaricata has quite yellow leaves except green growth at end of branches.

5/12/66 Gum doing well, others anemic.

12/12/66 Same.

31/1/67 "

21/2/67 all three trees doing well. Growing fast, new leaves.

14/3/67 Same
