Mr. Reber:

Your antique radio friend from Brooklyn (I think; the one who can't hear or speak) was in today. He wanted to know if your collection was still in the warehouse, which made me think it was something he wanted which you might have. Ended up by noting that he would just have to wait until you returned, and I told him we didn't know when this would be.

THE NATURALISTS' DIRECTORY wants to know if you want more than the following* to appear in the new edition: "Expt & manipulation of twining vines. See Castanea." There's no charge though they did say you could order a copy at \$5. Let me know about the listing. What does "Expt" refer to? Experiment?

Jennie
