Dr. Grote Reber,
% Post Office General Delivery
Bothwell, Tas. 7411

Dear Dr. Reber,

A few days ago I received a telex from Pentticton relaying a request from Dr. Kerwin and Dr. Locke (NRC-Ottawa) that I try to arrange a visit with you to discuss the state of low-frequency radio astronomy in Canada.

I am working temporarily at CSIRO - Radiophysics but will be returning to the Observatory in Pentticton on Jan. 27th. I could come to Tasmania to meet with you on Jan. 17th if this is convenient for you. In the next two or three weeks I can be contacted by letter at the following address:

R.S. Roger
% S.H. Green,
24 Batman St.,
Clayfield, Brisbane 4011 Qld.

If you could tell me if this date is suitable and where you would like to meet (ie. Hobart or Bothwell), I will make travel arrangements accordingly.

Looking forward to seeing you once again,

Yours sincerely,
Robert Roger
