Att: Le Capitaine de Corvette Halley
Chef de la Section

Dear Sirs:

This letter is an inquiry about the ionosphere data from Dakar in reference to your letter No. 462/SPIN/BC dated 18 April 1956. So far, no additional data has arrived here since your dispatch of 3 November 1955.

Dakar is an important station in my study of Spread F. Consequently, I would be greatly pleased to receive additional monthly data sheets giving the hourly values of f_oF_2 starting January 1955 and continuing down to the present time.

If it is necessary to make photographic reproductions of existing tables, I will be pleased to remit by an international money order whatever the charges may be including the air mail postage.

Hoping to hear from you upon this matter at your earliest convenience, I am

Yours faithfully,

Grote Reber
