Mr Frote Reber
Green Bank West Va.

Dear Sir:

I noticed your ad in the Feb Q.S.T. which stated that you were wanting old battery radios and tubes.

I have a one tube set that was built by the Michigan Radio Corp. in Grand Rapids Mich in the early 20's. It uses a 6V199 tube and is wired with buss bar. as far as I know it was one of the first factory built sets on the market. I don't have a picture of it but will draw a rough sketch in case you are not familiar with it.

as for the tubes that you mentioned
I have three UV 199 and about twelve
⑫ 299 tubes in Cunningham cartons but
they have been used I think.

I also have about seven old
home made sets that were built
in the early 20's by a local man
that had plenty of money to put in
to them. Some are in solid mahogany
cabinets with panel meters etc.
I am not sure but I think some
are early super-hets. These are
stored and I haven't seen them
for some time so I don't know
exactly what they are, old and
fancy. ^{except}

If you are interested in any of this
material please give me some
idea as to what you ^{would} pay for same
and I could send pictures and
more info if necessary

yours truly
