BRISBANE, Qld.

Dear Sirs,

A couple of packets of your Snake Bean seed were purchased at Coles a few months ago. Unfortunately they have not prospered because of inadequate heat and moisture here. My interest is primarily in the vine. I would appreciate information on the following.

1. What is the botanical or Linnean name?
2. What color are the flowers?
3. Which way does the vine twine? Counter-clock-wise like a right hand screw thread or clockwise like a left hand screw thread?
4. About how many beans per pod?
5. Where is its native home?

Your comments will be much appreciated
by me.

Yours faithfully,

Grote Reber.
