Dear Hap:

Sorry that it has taken me so long to get around to responding to your letter of 2 March.

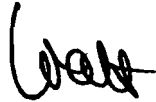

I think that Jim Warwick is still the very best local expert in the areas in which Grote works. I have sent him your things to see whether he has any comment to make, or whether he can suggest to me someone else in the local scene who might be able to make meaningful comment.

The minute I hear from him, I will forward my information to you.

As for my own viewpoint, I have carefully read the information from Grote, and I am inclined to believe that if he wants to invest his effort in this, it is highly meritorious of support. He is an unusual, imaginative, and utterly honest man, and the kind of person that I think deserves backing. He will do things the unconventional way, and sometimes his interpretations will be criticized, but his work always has a touch of experimental genius in it.

Janet says hi to all the Schauers.

Sincerely yours,

Walter Orr Roberts
