Dear Hap:

Enclosed is a letter from Mullard. Last July you ordered for me some filters which now are completed. I would like to have you attach the additional three to your first order to be shipped all at one time in about six weeks. There is plenty for me to do here until they arrive and one shipment will be simpler to handle than two.

It's a good thing you sent to me some extra fotos of the mirror for Harlow Shapley. A few days later Lilley also wanted one and I was happy to be able to oblige.

It now appears my short article about "Lava Flows on Haleakala" will be published by the Geological Society of America.

There are many signs of the arrival of spring including the activities of Beavers in Deer Creek.

Incidentally, I found a vine which turns left handed and empty seed pods in the form of three parallel vanes spaced 120° . The seeds had all fallen out so it seems that the vine replants itself every year. I'll be looking for the new vines to appear along in May or June. Next autumn I intend to harvest some of the seed and send to Australia. The pole beans I sent down there came up OK and turned the same way in Tasmania they do in ~~HAWAII~~ Hawaii. Consequently the phenomenon is not related to the turning in atmospheric storms or water in bath tub.

Best regards,

Grote
