
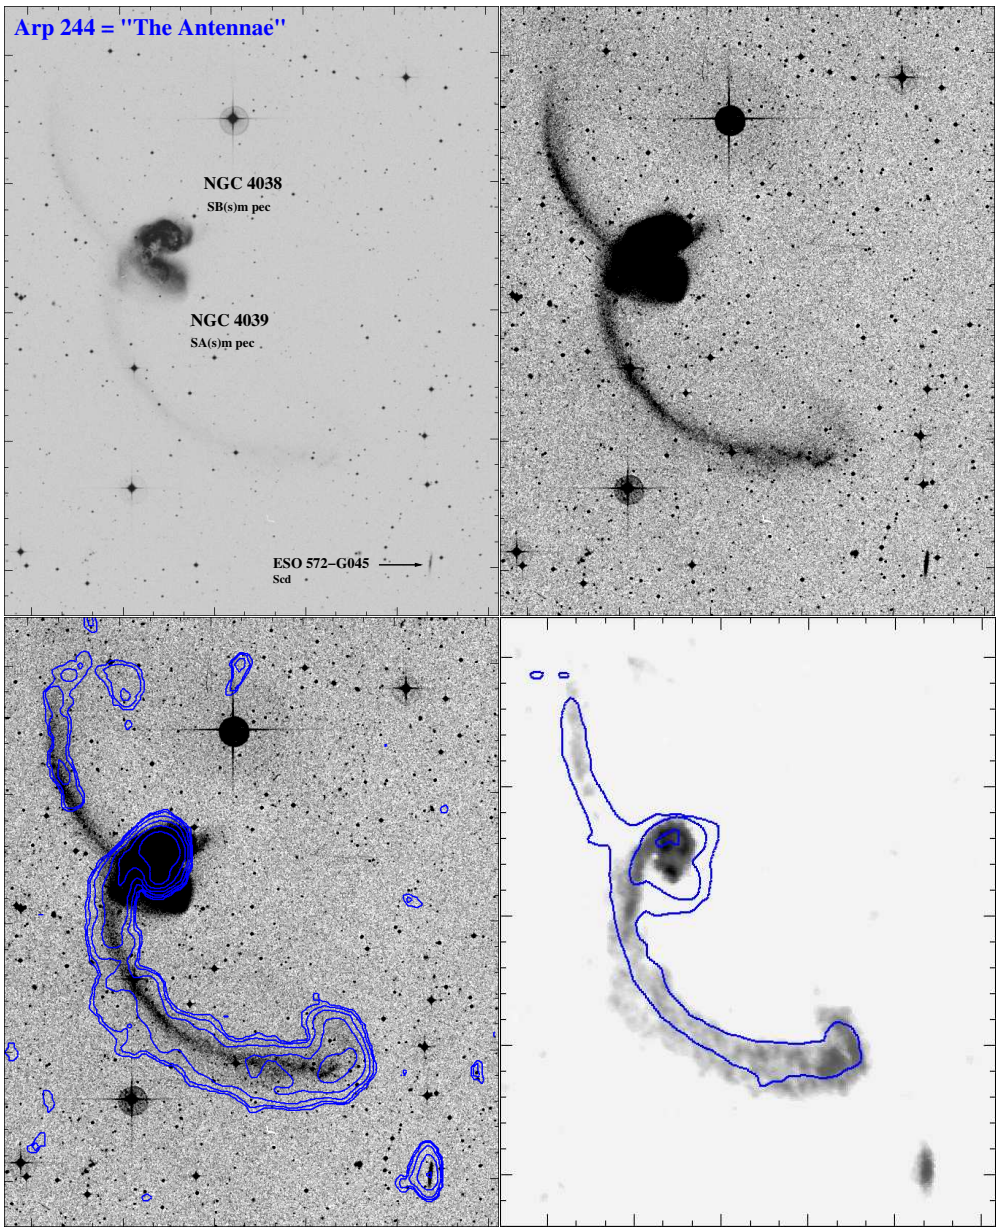

Figure 1. **The Toomre Sequence merger NGC 4038/9**.
H I: VLA C+D-array, 40″ resolution, contours=4×10^{19} cm$^{-2} \times 2^n$.
Optical: DSS, FOV=$20' \times 24'$.
Notes: The H I concentration at the end of the southern tail is associated with a putative Tidal Dwarf Galaxy. For a close-up of the companion galaxy ESO 572–G045 see Fig. **??**.
